TO WHO IT MAY CONCERN

This is to certify that Mr. Saad Tahir from School of Mechanical and Manufacturing Engineering worked as a member of Team BGreen participating in Solar Decathlon Middle East 2018. Solar Decathlon is an international competition created by the U.S. Department of Energy in which universities from all over the world meet to design, build and operate a grid-connected, energetically self-sufficient house.

Saad was the member of the project team from July 20 17 to February 2018. During this time, he worked in the Mechanical Team from July 2017 to September 2017 where he designed an HVAC System and Solar Water Heating System for the proposed house. Afterward, Saad served as the Project Coordinator from September 2017 to February 2018. Team BGreen submitted two deliverables under his supervision.

Saad displayed exceptional commitment while he represented Team BGreen. I wish him a successful and bright future.
